Professional Certificate in Project Management

Projects are becoming more complex, project managers and teams are often being asked to do more with less, and executives and clients expect innovation, agility, and responsiveness. We offer project management training, leading to a Professional Certificate in Project Management, designed to give project managers (and any other professionals who work on projects) the tools they need to successfully manage any type of project – regardless of scope or industry.

Who Will Benefit

- Professionals planning, managing, and controlling projects within an organization
- Managers who need to fine tune and formalize their project management skills
- Those interested in learning the latest project management tools and methodologies

- Anyone managing multiple tasks
- People who want to take PMI®'s Project Management Professional (PMP)® exam
- Anyone interested in a career in project management

The Certificate

To earn the certificate, students need to complete all nine courses: *Introduction to Project Management: Framework and Integration; Team Building; Scope, Time, and Cost; Human Resources and Communications; Procurement; Microsoft Project for Project Managers; Project Risk Management; Earned Value Management; and Capstone: Project Simulation.*

Location of Classes

SDSU Extended Studies/Gateway Centers, Hardy Avenue entrance, unless otherwise noted.
